Concept Systems Inc. Expands its Reach to the Southeast

Fast-growing systems integrator opens office in North Carolina to strengthen client relationships.

Albany, OR – June 22, 2011 - Concept Systems Inc., a leading industrial systems integrator with offices in Oregon, Washington, and Colorado today announced that it has opened an East Coast office in Charlotte, North Carolina. The new location accommodates the company's growth and strengthens Concept's ability to provide East Coast clients with personal customer service.

Tim Dyksta, Concept Systems Sales Engineer, will lead the Southeast office, in Charlotte, North Carolina. Tim has a BS in Business Administration and five years of automation sales experience with Keyence Corporation. Tim's territory includes Florida, Georgia, South Carolina, North Carolina, Virginia, West Virginia, Kentucky, Tennessee, Alabama, and Mississippi.

Among Concept Systems' existing clients in the Southeast are The Boeing Company, the world's largest aerospace company and leading manufacturer of commercial jetliners and defense, space and security systems, American Crane & Equipment Corporation, a leader in the design and manufacture of electric overhead traveling cranes, wire rope hoists and custom engineered lifting equipment, and a multiple of wood products customers.

"Opening an office in the Southeast has been a goal for Concept Systems for some time," says Michael Gurney, Co-CEO and VP Sales and Marketing, Concept Systems Inc. "We have a long established client base there, and this will allow us to provide our customers with more direct contact with Concept, while allowing us to continue to add to our client base in the Southeast."

About Concept Systems Inc.

Founded in 1999 and based in Albany Oregon with offices in Seattle, Washington, and Denver, Colorado, Concept Systems Inc. provides automation services by taking advantage of the latest in proven technologies. These technologies include: PLC and DCS based controls, motion control and vision inspection, data-base applications, and production asset management systems.
