

Composer Retrofit

We Can Take You There!™

REDUCE
THE NUMBER
OF SPARE PARTS
MAINTAINED
IN YOUR PLANT!

Improved Veneer Recovery

More precise veneer positioning at the clipper.

Modern Control Hardware Components

ControlLogix and Kinetix replaces PLC-5, IMC and 1391 hardware. Other hardware manufacturers supported upon request.

Open Architecture

No more black boxes. Standardize to ControlLogix! No more proprietary PLC programs controlling general functions. No more custom hardware and software for defect clip control and motion control. 100% commercial off-the-shelf hardware and 100% fully documented ladder logic software. Your team will have the tools to maintain the system.

Improved Recovery through Servo Squaring

Aligns veneer prior to clipping for optimum recovery.

Improved Defect Sensing

Non-contact sensors that calibrate by the touch of a button. An optical scanner for full face inspection is also available.

Retrofits include all:

- Panel Equipment Sales (PES)
- Hashimoto
- Durand Raute
